

## Social Security Administration

## § 404.1519m

with another medical source. A good reason may be that the medical source we designated had previously represented an interest adverse to you. For example, the medical source may have represented your employer in a workers' compensation case or may have been involved in an insurance claim or legal action adverse to you. Other things we will consider include: The presence of a language barrier, the medical source's office location (e.g., 2nd floor, no elevator), travel restrictions, and whether the medical source had examined you in connection with a previous disability determination or decision that was unfavorable to you. If your objection is that a medical source allegedly "lacks objectivity" in general, but not in relation to you personally, we will review the allegations. See § 404.1519s. To avoid a delay in processing your claim, the consultative examination in your case will be changed to another medical source while a review is being conducted. We will handle any objection to use of the substitute medical source in the same manner. However, if we had previously conducted such a review and found that the reports of the medical source in question conformed to our guidelines, we will not change your examination.

[65 FR 11876, Mar. 7, 2000]

### **§ 404.1519k Purchase of medical examinations, laboratory tests, and other services.**

We may purchase medical examinations, including psychiatric and psychological examinations, X-rays and laboratory tests (including specialized tests, such as pulmonary function studies, electrocardiograms, and stress tests) from a medical source.

(a) Subject to the provisions of § 405.805(b)(2) of this chapter in claims adjudicated under the procedures in part 405 of this chapter, the rate of payment to be used for purchasing medical or other services necessary to make determinations of disability may not exceed the highest rate paid by Federal or public agencies in the State for the same or similar types of service. See §§ 404.1624 and 404.1626 of this part.

(b) If a physician's bill or a request for payment for a physician's services

includes a charge for a laboratory test for which payment may be made under this part, the amount payable with respect to the test shall be determined as follows:

(1) If the bill or request for payment indicates that the test was personally performed or supervised by the physician who submitted the bill (or for whose services the request for payment was made) or by another physician with whom that physician shares his or her practice, the payment will be based on the physician's usual and customary charge for the test or the rates of payment which the State uses for purchasing such services, whichever is the lesser amount.

(2) If the bill or request for payment indicates that the test was performed by an independent laboratory, the amount of reimbursement will not exceed the billed cost of the independent laboratory or the rate of payment which the State uses for purchasing such services, whichever is the lesser amount. A nominal payment may be made to the physician for collecting, handling and shipping a specimen to the laboratory if the physician bills for such a service. The total reimbursement may not exceed the rate of payment which the State uses for purchasing such services.

(c) The State will assure that it can support the rate of payment it uses. The State shall also be responsible for monitoring and overseeing the rate of payment it uses to ensure compliance with paragraphs (a) and (b) of this section.

[56 FR 36957, Aug. 1, 1991, as amended at 65 FR 11876, Mar. 7, 2000; 71 FR 16444, Mar. 31, 2006]

### **§ 404.1519m Diagnostic tests or procedures.**

We will request the results of any diagnostic tests or procedures that have been performed as part of a workup by your treating source or other medical source and will use the results to help us evaluate impairment severity or prognosis. However, we will not order diagnostic tests or procedures that involve significant risk to you, such as myelograms, arteriograms, or cardiac catheterizations for the evaluation of disability under the Social Security
